

SUMMARY

Growth-focused Product Analyst with 5+ years of experience driving funnel optimization, GMV growth, and experimentation across large-scale consumer platforms (TikTok, Alibaba, Meituan). Experienced in owning core metrics, designing A/B tests end-to-end, and translating ambiguous business problems into measurable revenue impact.

PROFESSIONAL EXPERIENCE

Chicago EAC – Data Scientist (Project-based) Chicago, IL 02/2026 – Current

- Developed an **AI-enabled analytics platform** (Python, Streamlit, DuckDB, SQL, Gemini API) to enable non-technical stakeholders to self-serve product and growth insights, reducing **repetitive ad-hoc analysis** requests.
- Identified **high-frequency business questions** and productized them into **8 reusable SQL workflows**, creating a scalable framework for standardized decision support.
- Integrated **Gemini-powered** guidance to translate ambiguous stakeholder questions into structured analysis paths and generate SQL-backed reports with transparent metric definitions and data lineage.

TikTok - Business Analyst Intern (SMB Growth) Seattle, WA 10/2025 – 12/2025

- Delivered **40.8% GMV growth** during Black Friday (+16pp vs. market) by diagnosing seller performance bottlenecks and removing activation barriers through segmented prioritization.
- Conducted **LLM-assisted** seasonal category analysis for womenswear, quantifying holiday **GMV uplift** (holiday daily GMV vs. annual baseline) to identify opportunity subcategories that informed targeted seller recruitment and inventory prioritization.
- Rebuilt the **seller GTM intelligence framework** by integrating growth-velocity metrics and new-entry signals into absolute search volume rankings, enabling earlier trend detection (3–5 days ahead) and increasing **seller engagement** by 18.1%.
- Built KPI tracking system, developing automated **Tableau/SQL reporting** to analyze GMV trends and seller contribution, identifying high-potential sellers to pilot new live-stream formats.

Action - CX User Analytics Intern Round Rock, TX 06/2025 – 08/2025

- Engineered **Python-based ETL scripts** to integrate Pendo (API) and Salesforce data (SQL) into Amazon Redshift, implementing data validation and quality checks to ensure data integrity and reducing processing latency by 40%.
- Analyzed clickstream and user journey data across 14K+ users to identify **funnel drop-offs** (61.6% post-click) and inform targeted homepage experiments that increased activation by 14.7%.
- Performed **cohort analysis** to examine user behavior, defined behavioral metrics and **segmented users** into power, regular, and occasional tiers; partnered with Customer Experience team to tailor engagement playbooks for 1500+ enterprise data users.

Meituan – Data Analyst, Product Insights (Full-Time) Shanghai, China 05/2023 – 06/2024

- Evaluated incremental **merchant acquisition scenarios** across **existing channels**, prioritizing zero-result map searches (15K+ monthly leads) and launching an in-map submission flow to unlock new supply growth.
- Analyzed **end-to-end onboarding funnel** performance, identifying friction points and redesigning required inputs to improve conversion by 4.8% and reduce completion time by 16.3%.
- Synthesized **behavioral log data** and user feedback to formulate a core hypothesis around incentive misalignment, designing and analyzing an **A/B test** comparing flat vs. bundled reward structures.
- Led the **full experiment cycle**—hypothesis framing, primary and guardrail metric definition, power analysis, cross-functional rollout, and impact evaluation. The bundled incentive increased merchant submissions by 33.3% while **maintaining submission quality and cost efficiency**, validating incentive redesign as a scalable growth lever.

Alibaba Group – Growth Strategy Analyst (Full-Time) Shanghai, China 10/2021 – 05/2023

- Owled growth analytics for a **\$19M+ daily GMV** marketplace, building a **three-layer executive dashboard** integrating 15+ data sources for real-time monitoring, driver diagnostics, and city-level anomaly detection, reducing **120 manual hours** per month.
- Directed **cross-functional execution** of the Spring Festival campaign, identifying rider capacity as the primary bottleneck and reallocating resources to **high-impact cities** based on population inflow and historical GMV trends; delivered **101.6% of target**.
- Applied **causal inference** to isolate incremental lift from targeted coupon interventions, separating organic holiday demand and driving a 6.8% net GMV increase.

Trip.com Group (Top-3 global OTA) - Business Analyst (Full-Time) Shanghai, China 08/2019 – 09/2021

- Led **top-down diagnostic analysis** for the “Worry-Free Rental” program after penetration plateaued at 35%, identifying low adoption among high-value vehicle suppliers due to misaligned one-price-fits-all packaging.
- Proposed and implemented a tiered **pricing model** aligned with vehicle value, partnering with Product and Marketing to relaunch the program; increased penetration from 35% to 48%, and improving NPS by 12%.

EDUCATION

Brandeis University - M.S. in Business Analytics Waltham, MA 08/2024 – 02/2026

Honors: GPA: 3.93/4.00, Award for Academic Excellence

Maastricht University - M.S. in Work and Organizational Psychology Maastricht, Netherlands 09/2015 – 08/2016

East China Normal University - B.E. in Psychology Shanghai, China 09/2011 – 07/2015

TECHNICAL SKILLS

Programming Languages: Advanced SQL, Python (Pandas, NumPy, scikit-learn), R

Experimentation & Analytics: A/B Testing, Causal Inference, Funnel & Cohort Analysis, Time Series Forecasting

Growth & Measurement: KPI Design, Incrementality Analysis, Segmentation Strategy, Revenue & GMV Modeling

Data Visualization: Tableau, Advanced Excel (Pivot Table, Array Formulas), Matplotlib, Seaborn
